### **DETAILED ACTION**

1. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

#### ***Claim Rejections - 35 USC § 102***

2. The rejection of claims 1, 6-15, 17 and 19 under 35 U.S.C. 102(b) as anticipated by Prutchi et al.'421 is maintained for the reasons set forth in the prior Office action.

#### ***Claim Rejections - 35 USC § 103***

3. The rejection of claims 2-5 and 18 under 35 U.S.C. 103(a) as anticipated by Prutchi et al.'421 further in view of Taylor et al.'513 is maintained for the reasons set forth in the prior Office action.

#### ***Response to Arguments***

4. Applicant's arguments filed 06/22/2006 have been fully considered but they are not persuasive. Applicant argues that the header of Prutchi et al.'421 lacks a hermetically isolated transducer chamber. Examiner notes that oximetry sensor 70, while embedded in header 20, is inherently contained within a chamber, the chamber comprising the space within the header mold that the sensor occupies. Contrary to Applicant's assertions, the term "chamber" as recited in the claim [and as given in the definition recited by Applicant] does not exclude having some or all of the boundaries of the "chamber" contacting the transducer contained within the chamber. Regarding Applicant's comments on Taylor et al.'513 on page 13 of the remarks, Examiner notes that claim 1 was rejected under 35 U.S.C. 102(b) by Prutchi et al.'421 alone. Regarding dependent claims 2-5, Applicant contends that Prutchi et al.'421 does not teach the limitations of claim 5. Examiner notes that the claims were rejected by the combination of Prutchi et

al.'421 further in view of Taylor et al.'513, which discloses an optically-transmissive optical element (header 20) that is hermetically sealed to a closure element (feedthrough pins), wherein the space not occupied by the header and feedthrough pins (i.e. the space occupied by the oximetry sensor) defines the transducer chamber. In response to applicant's arguments against the references individually, one cannot show nonobviousness by attacking references individually where the rejections are based on combinations of references. See *In re Keller*, 642 F.2d 413, 208 USPQ 871 (CCPA 1981); *In re Merck & Co.*, 800 F.2d 1091, 231 USPQ 375 (Fed. Cir. 1986).

### ***Conclusion***

5. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
